

**Innovation.  
Reliability.  
Quality Filtration.**

## As the California wine industry continues to flourish, ensuring the highest quality of wine production remains paramount.

Recent developments have left a supply void in the filtration market. Several prominent players in the field have exited the market, leaving wineries seeking reliable alternatives. Heyes Filters can help you fill this gap, offering cutting-edge filtration solutions tailored to the unique needs of California wineries. We can enhance your wine production process in the following ways:

**Proven Expertise** With decades of experience, Heyes Filters understands the intricacies of wine filtration. Their team of experts collaborates closely with winemakers to deliver customized solutions.

**Comprehensive Range** Heyes Filters offers a wide array of filter cartridges, including pre-filters and final filters. Whether you need to remove particulates, bacteria, or spoilage organisms, Heyes has you covered.

**Technical Support** Heyes provides exceptional technical support, assisting wineries in optimizing their filtration processes

**Elevating Your Wine Production Process**

# World Class Membrane Technology

Our **Innovative Approach** will help you achieve:

## **Pore Size Differentiation**

Precise membranes allow precise control over pore sizes, optimizing wine clarification and flavor preservation.

## **Sanitary Housings and Hardware**

Heyes' filter housings and cartridges are designed for easy installation, maintenance, and thorough cleaning.

## **Environmental Commitment**

Heyes prioritizes sustainability, minimizing waste and energy consumption.

## **Featured Products**

### **Pre-Filtration Cartridges**

Ideal for removing larger particles and protecting downstream membrane filters.

### **Final Filtration Membranes**

Validated for wine spoilage organism removal, ensuring microbiological stability.

### **Depth Filtration**

Full complement of standard filter sheets and lenticular modules in DE and DE Free media, as well as a line of specialty sheets and lenticulars aimed at specific solutions, such as TCA removal.

### **Crossflow Filtration Systems**

Efficiently remove unwanted particles while preserving wine quality with single, multi-module and expandable systems.

## **Elevating Your Wine Production Process**

Heyes Filters stand ready to support California wineries in your pursuit of excellence. Say goodbye to the supply void. Our warehouses are strategically located to allow for one day shipping of in-stock items to most areas in California. **Call us today!**
